EDUCATION

Shiv Nadar University Chennai

Bachelor of Technology in Artificial Intelligence and Data Science; **CGPA: 8.65**

Chennai, India

Aug 2021 - June 2025

EXPERIENCE

Data Scientist (promoted from Junior Data Scientist, Apr 2026)

December 2024 – Present

Applied Data Finance

On Site

- Improved conversion for a new small-dollar lending product from 9% to 18%, driving \$600K in additional funded volume.
- Led pricing experiments across affiliate channels, optimizing APRs based on approval, click and funded-loan funnel performance, driving \$100K in incremental funded volume with a 10-point APR increase.
- Implemented TransUnion (TU) variable-based cutoffs, reducing PD30 by 10% and contributing to \$200K in additional funded volume.
- Analyzed end-to-end affiliate funnels across multiple channels and underwriting flows, quantifying conversion changes and identifying key drivers of lead-to-fund performance.

GenAI Developer Intern

October 2024 – November 2024

HiDevs

Remote

- Developed a **multi-lingual** AI recruitment bot using **Llama 3.2** and **Sarvam API**, incorporating multi-agent decision-making for automated candidate screening.
- Integrated **Twilio WhatsApp** messaging to enable real-time candidate communication and deliver recruitment insights to administrators.

Data Scientist Intern

December 2023 – July 2024

Sports Mechanics India Pvt Ltd

On-site

- Developed an automated **real-time sports commentary generation** system using a quantized **Mistral-7B** model.
- Built and deployed an automated **ICC T20 World Cup 2024** notification system using the OneSignal API, enabling real-time match updates in the BCCI mobile app.

Computer Vision Intern

May 2023 – July 2023

Tata Consultancy Services

Remote

- Developed a **YOLOv8**-based PCB component detection system and integrated **SAHI** for improved detection of small components, achieving 82% mAP.

PROJECTS

MiniGPT-Med: Large Language Model for Radiology Diagnosis | *EVA-CLIP, Llama2*

- Built a multimodal AI system for analyzing X-rays, MRIs and CT scans, generating automated radiology reports.
- Implemented **EVA-CLIP** for visual encoding and **Llama 2** for language generation, achieving **0.26 IoU** and **0.55 BERT similarity**.

Real Time Market Insights | *Algorithmic Trading, Streamlit, NLP*

- Developed an advanced financial analysis tool with real-time stock price updates from **YFinance** and market sentiment analysis using **FinBERT**.

TECHNICAL SKILLS

- Languages:** Python, MySQL
- Frameworks & Tools:** Tensorflow, PyTorch, Flask, Tableau, Microsoft Power BI, ReactJs
- Libraries:** NumPy, pandas, matplotlib, scikit-learn, OpenCV, NLTK, Langchain, HuggingFace Transformers
- Expertise:** NLP, Deep Learning, Computer Vision, DBMS, Generative AI (LLMs), Agentic AI

HONORS AND AWARDS

Scale +91 Hackathon Finalist | *Fintech Festival India 2024, Yashobhoomi Convention Centre, New Delhi*

- Secured **5th** place among 3000+ participants in the fintech hackathon among Startups, Companies and Students.
